

# Flood and landslide assistance and training

## FLAT

### **PROJECT PARTNERS:**

*Municipality of Danilovgrad (ME) - Lead partner*

*Municipality of Brindisi (IT)*

*Association of Albanian Municipalities (AL)*

*Municipality of Niksic (ME)*

*Mountain rescue service of Montenegro (ME)*

*Associated partner is Ministry of Interior of Montenegro -*

*Directorate for Emergency Management (ME)*

*FLAT project is part of the Interreg IPA CBC Italy-Albania-Montenegro Programme with total budget of 959.073,71 euro.*

*Project specific objectives are improved structures for responding in case of floods and landslides, strengthened capacities of Protection Services and creating integrated initiatives for floods and landslides preparedness and rescue in the programme area. Created multi-level plans and tools for improvement of protection and risk management in flood-prone and landslide areas in the programme area.*

*Main project result is improved protection and risk management in flood-prone and landslide areas in the programme area.*

## JULY/AUGUST/SEPTEMBER 2019

Municipality of Danilovgrad and Municipality of Niksic after conducted tender procedures acquired a TETRA connection system for the Rescue Service of Danilovgrad and Rescue service of Niksic, and in order to achieve better preparedness for reaction in case of floods and landslides.

The Rescue Services so far used an analogous link system that has been overcome. TETRA is a digital system that can be networked both at the level of the municipalities and at the level of Montenegro without her services. Its use will enable smooth communication and coordination on the field when rescue actions are needed.

## OCTOBER 2019

- ▶ Advanced level Workshop for reaction in case of floods, landslides and coastal erosion was held in Municipality of Brindisi. Lectures provided participants, of all three programme countries, five Municipalities - Danilovgrad, Vau i Dejes, Tirana, Shkodra and Lezha, with multidisciplinary knowledge and understanding of the various landslide and flood phenomena, from basic to master level.

- ▶ *Mid-term review meeting was held in Municipality of Danilovgrad in the premises of the newly opened Regional resource center for reaction in case of floods and landslides.*

## NOVEMBER/DECEMBER 2019

- ▶ *Municipality of Brindisi, after conducting tender procedures, purchased planned equipment for monitoring the activities of coastal erosion.*
- ▶ *Mountain rescue service of Montenegro purchased specialized equipment for rescue in case of landslides.*

*This equipment makes a significant contribution improving preparedness for response in case of these natural disasters.*

*The third Project partners and work group meeting was held in Niksic, Montenegro. The overall objective of the meeting was general overview of what has been done, presentations of on going activities and achieved results, as well as planing the next steps for further realization of activities.*
